

# 2017 DRAGON SCIENCE CAMP

**Session 1 and 4 – Mad Scientist** Step into the lab and start stirring things up. Explore chemical reactions that bubble, pop and ooze. Concoct your own slime and glow in the dark goo. Make your own snow and explode a Mentos fountain. Blow bubbles as big as your head for everyone to see!

**Session 2 – Build 'Em and Break 'Em** Are you a Dragon Engineer? Get ready to use your brain to win each of the design challenges. Work in teams to build a bridge that is "un"breakable. Design a floatable boat and a water rocket that launches the highest. Build a car that is safe enough to protect a raw egg from breaking.

**Session 3 – Dragon Doctors** Explore what makes the human body both gross and amazing. Dissect a sheep's brain and a cow's eyeball to discover how these organs work. Make edible blood and edible poop that will gross out your family. Learn how the kidney removes urine and the tongue helps you taste. Leave camp as the resident expert on wacky body science facts!
